This student has successfully completed the research apprenticeship:

(Advisor's signature/approval)

(Date)

Please indicate the relative contribution of you and the student to each of the following phases of research. The student is being asked this question, and we would like to have your perceptions of the process. You may need to modify these descriptions to fit your research paradigm.

	Primarily Advisor	About Even	Primarily Student
Initial articulation of project			
Identification of key construers, concepts, issues.			
Operationalization of research questions			
Planning strategies for data collection			
Implementation of data collection			
Planning of analysis procedure			
Conducting analysis			
Interpretation of findings			

1. How many hours of student contact time did you devote to this student's apprenticeship?
2. How much additional time did you spend to critique and review work in progress?
3. Please write a short statement about the role of the research apprenticeship in the development of this student as a researcher.
